

# COMMERCIAL AWARENESS FOR TECHNICAL PEOPLE – 2 DAYS

Technical staff need to understand the commercial context within which their work exist. Today, technical people are expected to be multi-faceted; understand stakeholder's management, sales and how the business profit is derived, the business value chain, operating environment and change control.

This course will help them understand how they and their work fit into a larger picture, why they may be asked to undertake roles that may not appear to be technical and the impact their interactions have within the commercial context.

## Learning objectives

At the end of this course, participants will:

- See collaborative roles within a business context
- Understand the need to support, sales and marketing
- Differentiate between excellence and perfection
- Recognise the factors affecting profitability
- Control costs and consider the bottom line impact of decisions
- Manage change requests
