

# WAREHOUSE OPERATIONS – PLANNING AND MANAGEMENT COURSE

**Effective and efficient warehouse operations** are integral to a company's success. **Warehouse operations** should ensure that a company ships and receives vital stock in time for replenishment on store shelves or in manufacturing facilities. This entails managing the dynamic environment within which work is done. This training offers a powerful methodology for planning, managing and controlling your warehouse operations.

## **Learning Objectives:**

Participants will:

- Maximize the use of space, equipment, and labour.
- Select the best combination of materials handling and storage equipment
- Speed up order processing while cutting costs
- Coordinate goods to bond premises
- Design an effective loss-control program
- Determine the best warehouse layout
- Control inventory and locations
- Measure warehouse performance to find troublespots
- Improve procedures for put-away, packing, loading, picking, and receiving
- Identify ways to apply these ideas to your specific environment
